# THE JOURNAL OF HYGIENE

*(Founded in 1901 by G. H. F. Nuttall, F.R.S.)*

EDITED BY

R. M. FRY, M.A., M.R.C.S.
Lately Director of the Public Health Laboratory, Cambridge

J. H. McCOY, M.B., D.P.H.
Director of Public Health Laboratory, Hull

AND R. D. BARRY, M.A., B.V.Sc., Ph.D., Sc.D.
Huddersfield Lecturer in Special Pathology in the University of Cambridge

IN CONJUNCTION WITH

P. ARMITAGE, M.A., Ph.D.
Professor of Biomathematics in the University of Oxford

W. I. B. BEVERIDGE, D.V.Sc., Sc.D.
Lately Professor of Animal Pathology in the University of Cambridge

A. B. CHRISTIE, M.A., M.D., F.R.C.P., F.F.C.M.
Physician Superintendent, Fazakerley Hospital, Liverpool

A. W. DOWNIE, M.D., F.R.S.
Lately Professor of Bacteriology in the University of Liverpool

R. I. N. GREAVES, M.D., F.R.C.P.
Lately Professor of Pathology in the University of Cambridge

O. M. LIDWELL, D.Phil.
External Scientific Staff, Medical Research Council

J. NAGINGTON, M.D.
Consultant Virologist, Public Health Laboratory Service

HILLAS SMITH, M.A., M.D., F.R.C.P.
Consultant Physician, Coppets Wood Hospital

Sir GRAHAM WILSON, M.D., LL.D., F.R.C.P., D.P.H., F.R.S.
Lately Director of the Public Health Laboratory Service

VOLUME 82 1979

# Index of Subjects

Activated sludge treatment; the influence of operating conditions on the behaviour of f2 coliphage, 285
Adiposity in wild mice, inherited, 309
Alcohol disinfection of skin, 497
Anaerobic caecal flora of the young chick; the incidence and anti-salmonella activity of, 263
Antibiotic production by dermatophyte fungi, 301
Antibiotic resistant *Escherichia coli* serotypes isolated from the sewage of Palmerston North (New Zealand), 443
Antibiotics, the effect of on the colonization resistance of the digestive tract of mice, 397
Antibodies (HI) against four prototype strains of influenza A virus in different age groups, 225
Antibody responses of burned patients immunized with a polyvalent *Pseudomonas* vaccine, 453
Antibody responses to vaccination with WRL 105 strain live influenza vaccine in previously vaccinated and unvaccinated volunteers, 489
Antihaemagglutinin antibody response induced in man by inactivated influenza vaccines and by natural infection, 51
Antimicrobial effects, delayed, of skin disinfection by alcohol, 497
Anti-salmonella activity of the anaerobic caecal flora of the young chick, 263
Antiseptics compared with detergents as skin 'degerming' agents, 89

Babies' napkins, evaluation of products for treating, 463
Bacterial shedding in the operating theatre; a garment to minimize, 7
Bacteriocin typing method for *Klebsiella*, the development and assessment of, 207
Bills of Health issued from Malta by the Order of St John, 419
Bitch with subclinical *Brucella abortus* infection associated with urinary excretion, 249
Brown Animal Sanatory Institution, 155, 337, 501
*Brucella abortus* in the bitch; subclinical infection associated with urinary excretion, 249
Burned patients immunized with a polyvalent *Pseudomonas* vaccine, antibody responses of, 453

Chick, young; factors affecting the incidence and anti-salmonella activity of the anaerobic caecal flora of, 263
Chill storage of poultry; microbiological aspects of polyphosphate injection in, 133
Clothes-borne infection, attempts to control in a burn unit, 2, 369; 3, 385
Colonization of hospital patients by klebsiellas, 177
Colonization resistance of the digestive tract of mice; the effect of three frequently applied antibiotics on, 397
Comparison of the tuberculin Tine$^+$ Test and the Mantoux, 79
Contact transfer of bacteria; prevention by an open-roofed plastic isolator, or plastic aprons, 385
Contact transfer of micro-organisms, a laboratory model for the investigation of, 237
Cross-colonization in a burn unit, the epidemiology of, 369
Cultural and biochemical characters of *Streptococcus milleri* strains isolated from human sources, 63

Dermatophyte fungi; ecological effects of antibiotic production by, 301
Detergents compared with each other and with antiseptics as skin 'degerming' agents, 89
Differentiation of *Mycoplasma mycoides* subsp. *mycoides* from certain closely related caprine mycoplasmas by mycoplasmaemia and cross-protection tests in mice, 407
Disinfection of skin by alcohol; delayed antimicrobial effects of, 497
Disinfection of swimming pools with ozone, 425

Electrolyte solutions in the out-patient management of acute gastroenteritis in infancy; comparison of oral sucrose and glucose, 15

Epidermal tissue as a primary site of replication of lymphocytic choriomeningitis virus in small experimental hosts, 21
*Escherichia coli* in gastroenteritis of children in London and Jamaica, 115
*Escherichia coli* from the sewage of Palmerston North (New Zealand); serotypes of antibiotic resistant strains of, 443

f2 coliphage; the influence of operating conditions of activated sludge treatment on the behaviour of, 285
Fabrics used for barrier clothing; an instrument for measuring bacterial penetration through, 361
Farm animals; a survey of trimethoprim resistance in the enteric bacterial flora of, 481
Foot-and-mouth disease virus inactivated by formalin or acetylethyleneimine; immune response to virus-infection-associated antigen in cattle repeatedly vaccinated with, 41

Garment for use in the operating theatre; the effect upon bacterial shedding, 7
Gastroenteritis of children in London and Jamaica, 101, 115
Gastroenteritis in infancy; comparison of sucrose and glucose electrolyte solutions in the out-patient management of, 15

Haemagglutination-inhibiting antibodies against four prototype strains of influenza A virus in different age groups, 225
Haemagglutination properties of influenza A (H1N1) viruses of the 1977/78 outbreak, 81
Herpes zoster and varicella, specific immunoglobulin responses after, 319
Household aggregation and household size; their influence on the attack rate in variola minor in Braganca Paulista County, 1956, 1
Humidity, the effect of on swine vesicular disease virus in dried films before and during formaldehyde fumigation, 255

Immunoglobulin responses after varicella and herpes zoster, 319
Inactivation of viruses in cattle and pig slurry by aeration or treatment with calcium hydroxide, 293
Increasing isolation of *Serratia* species from clinical specimens, 31
Influenza A virus, HI antibodies against four prototype strains of in different age groups, 225
Influenza A (H1N1) viruses of the 1977/78 outbreak: isolation and haemagglutination properties, 81
Influenza vaccine, live WRL 105 strain, antibody responses to in previously vaccinated and unvaccinated volunteers, 489
Influenza inactivated vaccines and natural infections, the specificity of the anti-haemagglutinin antibody response induced in man by, 51
Influenza virus immunization by live vaccine in an open population, 231
Inherited mild middle-aged adiposity in wild mice, 309

*Klebsiella*, a bacteriocin typing method for, 207
Klebsiella colonization of hospitalized patients, 177
Klebsiella infections in hospital patients, the incidence and sources of, 473

Lymphocytic choriomeningitis virus, replication of in epidermal tissue in small experimental hosts, 21

Maternity hospital, spread of *Salmonella typhi* in, 353
Milk-borne outbreak due to *Salmonella dublin*, 95
*Mycoplasma mycoides* subsp. *mycoides*; differentiation of from certain closely related mycoplasmas, 407

Non-cholera vibrios, survival and growth of in various foods, 123
Nosocomial klebsiellas, I. Colonization of hospitalized patients, 177; II. Transfer in a hospital ward, 195

Order of St John, four bills of health issued from Malta by, 419
Ozone for the disinfection of swimming pools, a bacteriological investigation, 425

Penetration of bacteria through fabrics, an instrument for measuring, 361
Plastic isolator or plastic aprons to prevent contact transfer of bacteria, 385
Polyphosphate injection in the processing and chill storage of poultry, 133
*Pseudomonas* vaccine, polyvalent, in treatment of burned patients, 453

*Salmonella dublin*, a milk-borne outbreak due to, 95
*Salmonella typhi*, spread of in a maternity hospital, 353
*Salmonella typhi*, phage type distribution of in Indonesia, 143
*Serratia* species, the increasing isolation of from clinical specimens, 31
Sewage of Palmerston North (New Zealand), serotypes of antibiotic resistant *Escherichia coli* isolated from, 443
Skin 'degerming' agents, a comparison of detergents with each other and with antiseptics, 89
Slurry, the inactivation of viruses in by aeration or by treatment with calcium hydroxide, 293
*Streptococcus milleri* strains isolated from human sources, the cultural and biochemical characters of, 63
Swimming pools disinfected with ozone, 425
Swine vesicular disease virus, the effect of relative humidity on in dried films before and during formaldehyde fumigation, 255

Transfer by contact of micro-organisms, a laboratory model for the investigation of, 237
Transfer of klebsiellas in a hospital ward, 195
Treatment of babies' napkins, evaluation of products for, 463
Trimethoprim resistance in the enteric bacterial flora of farm animals, 481
Tuberculin tests, a comparison of the Tine Test$^+$ and the Mantoux, 79

Urinary excretion of *Brucella abortus* by a bitch with a subclinical infection, 249

Vaccination with WRL strain live influenza vaccine in previously vaccinated and unvaccinated volunteers, antibody responses to, 489
Varicella and herpes zoster, specific immunoglobulin responses after, 319
Variola minor in Braganca Paulista County, 1956: household aggregation of the disease and the influence of household size on the attack rate, 1
Vibrios, non-cholera, survival and growth of in various foods, 123
Viruses: foot-and-mouth, 41; influenza, 51, 81, 225, 231, 489; lymphocytic choriomeningitis, 21; swine vesicular disease, 255; variola minor, 1
Viruses in cattle and pig slurry; inactivation of by aeration or treatment with calcium hydroxide, 293
Virus-infection-associated antigen in cattle repeatedly vaccinated with foot-and-mouth disease virus inactivated by formalin or acetylethyleneimine, immune response to, 41

# THE
# JOURNAL OF HYGIENE

*(Founded in 1901 by G. H. F. Nuttall, F.R.S.)*

EDITED BY

R. M. FRY, M.A., M.R.C.S.,
Lately Director of the Public Health Laboratory, Cambridge

J. H. McCOY, M.B., D.P.H.
Director of Public Health Laboratory, Hull

AND J. B. BROOKSBY, C.B.E., D.Sc., F.R.C.V.S., F.R.S.E.
Director of the Animal Virus Research Institute, Pirbright

IN CONJUNCTION WITH

R. D. BARRY, M.A., B.V.Sc., PH.D., Sc.D.
Professor of Virology, University of Newcastle, New South Wales, Australia

W. I. B. BEVERIDGE, D.V.Sc., Sc.D.
Lately Professor of Animal Pathology in the University of Cambridge

A. B. CHRISTIE, M.A., M.D., F.R.C.P., F.F.C.M.
Physician Superintendent, Fazakerley Hospital, Liverpool

A. W. DOWNIE, M.D., F.R.S.
Lately Professor of Bacteriology in the University of Liverpool

R. I. N. GREAVES, M.D., F.R.C.P.
Lately Professor of Pathology in the University of Cambridge

O. M. LIDWELL, D.PHIL.
External Scientific Staff, Medical Research Council

J. NAGINGTON, M.D.
Consultant Virologist, Public Health Laboratory Service

HILLAS SMITH, M.A., M.D., F.R.C.P.
Consultant Physician, Coppets Wood Hospital

Sir GRAHAM WILSON, M.D., LL.D., F.R.C.P., D.P.H., F.R.S.
Lately Director of the Public Health Laboratory Service

# Index of subjects

African swine fever antigen and antibody, solid-phase radioimmunoassay techniques for detection, 353; solid-phase enzyme-linked immunosorbent assay for detection, 363
Ampicillin resistance, characterization of R-plasmids coding for, 371
Antibody response in Legionnaires' disease, 377
Antibody studies in natural bovine cowpox, 425
A/Victoria/3/75 natural heterologous infection, comparison of protective efficacies of live vaccine RIT 4025 and an inactivated vaccine against, 221

Bacterial aerosols in a burns and plastic surgery unit, effects of ionization on, 199
Bacteriostasis of *Escherichia coli* by milk. III, 243; IV, 255
Blastogenic test for foot-and-mouth disease, a, 507
Bluetongue epidemic in Cyprus, August 1977, possible origin, 547
Bluetongue virus precipitating antibodies in sera of domestic animals, incidence of, 539
Bovine cowpox, natural, antibody studies in, 425
Brown Animal Sanatory Institution, 171
*Brucella abortus* antibodies, serological methods for detection in sera from vaccinated and non-vaccinated cattle, 491
Brucellosis diagnosis, growth agglutination and growth inhibition tests, 295
Burned patients, measurement of endotoxins with the limulus test in, 151
Burns unit, staphylococcal sepsis in, 429

Camelpox virus in Iraq, isolation, identification and characterization, 267
Cattle, vaccinated and non-vaccinated, serological methods for detection of *B. abortus* antibodies in sera from, 491
Chickens, frozen, cross-contamination during kitchen preparation, 27
Cigarette smoke, effect of long-term exposure on immune response to influenza virus, 135
Citrate utilization, in citrate-positive variants of *Escherichia coli*, distribution of plasmids determining, 331
*Clostridium botulinum*, immunofluorescent study of the spore antigens of proteolytic strains of, 1
*Clostridium botulinum* in soil on a cattle market site in London, 237
Comparison of the protective efficacies of the live vaccine RIT 4025 and an inactivated vaccine against a natural heterologous A/Victoria/3/75 infection, 221
Cowpox, natural bovine, antibody studies in, 425
Cross-contamination during the preparation of frozen chickens in the kitchen, 27
Cyprus bluetongue epidemic, August 1977, possible origin, 547

Disinfectants, relative resistance of f2 bacteriophage to inactivation by, 111

Endotoxin, intramammary infusion, effect on establishment of experimental mastitis by *Streptococcus agalactiae* in the cow, 103
Endotoxin, intramammary infusion, effect of on experimentally induced mycoplasmal mastitis, 501
Endotoxins, measurement with the limulus test in burned patients, 151
Enteric bacteria, enterotoxigenic, in foods and outbreaks of food-borne diseases in Sweden, 33
Enterotoxin production and drug resistance in *Escherichia coli* of human origin, occurrence of plasmids carrying genes for, 531
Enterotoxigenic enteric bacteria in foods and outbreaks of food-borne diseases in Sweden, 33
Enzyme-labelled immunosorbent assay, specific detection of foot-and-mouth disease virus whole particle antigen (140S) by, 127
Enzyme linked immunosorbent assay, application to detection and identification of foot-and-mouth disease viruses, 513
Epidemic mechanisms of Type A influenza, 11

*Escherichia coli*, bacteriostasis by milk. III, 243; IV, 255
*Escherichia coli*, citrate-positive variants of, distribution of plasmids determining citrate utilization in, 331
*Escherichia coli* of human origin, occurrence of plasmids carrying genes for both enterotoxin production and drug resistance in, 531
European rabbit flea, *Spilopsyllus cuniculi* (Dale), and myxomatosis, 285

f2 bacteriophage, relative resistance to inactivation by disinfectants, 111
Fomites, oral exposure to, and risk of salivary-mediated viral hepatitis type B transmission, 487
Food-borne diseases, enterotoxigenic enteric bacteria and, 33
Food poisoning in hospitals in Scotland, 231
Foot-and-mouth disease virus whole particle antigen (140S), specific detection by enzyme-labelled immunosorbent assay, 127
Foot-and-mouth disease, a blastogenic test for, 507
Foot-and-mouth disease viruses, detection and identification, application of the enzyme linked immunosorbent assay, 513

Growth agglutination and growth inhibition tests in diagnosis of brucellosis, 295

HLA antigens, and rubella vaccination, 405
Hong Kong, seropidemiology of rubella infection in Chinese and Caucasians, 397
Hospital areas, salmonella isolation from, 461
Hospital patients, studies on sources of *Klebsiella aerogenes* in, 391
Hospitals in Scotland, food poisoning in, 231

IgA antibody response in acute rubella determined by solid-phase radioimmunoassay, 69
IgM antibody in infants with rubella, comparison of detection methods, 413
Immunofluorescence and radioimmunoassay, for detecting IgM antibody in infants with the congenital rubella syndrome, comparison of, 413
Immunofluorescent study of the spore antigens of proteolytic strains of *Clostridium botulinum*, 1
Influenza, Type A, epidemic mechanisms of, 11
Influenza, vaccination against: a five year study in the Post Office, 157
Influenza vaccination with live attenuated and inactivated virus-vaccines during an outbreak of disease, 383
Influenza virus, secondary immune response, effect of long-term exposure to cigarette smoke, 135
Ionization, effects on bacterial aerosols in a burns and plastic surgery unit, 199
Ionization of air, effect on the air-borne transmission of experimental Newcastle disease virus infections in chickens, 59
Isolation, identification and characterization of camelpox virus in Iraq, 267

*Klebsiella aerogenes* in hospital patients, further studies on sources, 391

Laboratory breeding of the European rabbit flea, *Spilopsyllus cuniculi* (Dale), 521
Legionnaires' disease, antibody response in, 377
Limulus test, and measurement of endotoxins in burned patients, 151

Mastitis, experimental, established by *Streptococcus agalactiae*, effect of intramammary infusion of endotoxin on, 103
Mastitis, mycoplasmal, experimentally induced, effect of an intramammary infusion of endotoxin on, 501
*Mastomys natalensis*, laboratory tests of rodenticides for control of, 345
Measles in monkeys: an epidemiological study, 207
Microbial contamination of medicaments for treatment and prevention of pressure sores, 445
Microbial contamination of pharmaceutical products in the home, 277
Monkeys, measles in: an epidemiological study, 207
Muller-Kauffman tetrathionate, selenite F and Rappaport's medium, for isolation of salmonellas from sewage-polluted natural water, 451

Murine model system, exposure to cigarette smoke and response to influenza virus in, 135
Mycoplasmal mastitis, experimentally induced effect of an intramammary infusion of endotoxin on, 501
Myxomatosis and the European rabbit flea *Spilopsyllus cuniculi* (Dale), 285

Newcastle disease virus, experimental infections in chickens, effect of air ionization on airborne transmissions of, 59

Pharmaceutical products in the home, microbial contamination, 277
Pressure sores, microbial contamination of topical medicaments for treatment of, 445

R-plasmids coding for ampicillin resistance from *Salmonella* species, characterization, 371
Radioimmunoassay, compared with immunofluorescence for detecting IgM antibody in infants with the congenital rubella syndrome, 413
Radioimmunoassay techniques, solid-phase, for detection of African swine fever antigen and antibody, 353
Rainfall, and well water pollution in a West African (Gambian) village, 143
Rappaport's medium, selenite F and Muller-Kauffman tetrathionate, for isolation of salmonellas from sewage-polluted natural water, 451
Resistance, relative, of f2 bacteriophage to inactivation by disinfectants, 111
RIT 4025 live vaccine, and an inactivated vaccine: comparison of protective efficacies of against a natural heterologous A/Victoria/3/75/infection, 221
Rodenticides, laboratory tests for control of *Mastomys natalensis*, 345
Rubella, acute, IgA antibody response determined by solid-phase radioimmunoassay, 69
Rubella, congenital syndrome, and detection of IgM antibody in infants, 413
Rubella infection in Hong Kong, seroepidemiology, 397
Rubella vaccination, responses to HLA antigens, 405

Salmonella isolation from hospital areas, 461
*Salmonella* species, R-plasmids coding for ampicillin resistance from, 371
*Salmonella typhimurium* and *S. gallinarum*, virulence and infectivity; effect of antibiotic resistance plasmids, 305
Salmonellas, isolation by three different media from sewage-polluted natural water, 451
Schistosomiasis in snails, estimating the duration of latency and survival time, 77
Selenite F, Muller-Kauffmann tetrathionate and Rappaport's medium, for isolation of salmonellas from sewage-polluted natural water, 451
Sepsis, staphylococcal, in a burns unit, 429
Serological diagnosis of whooping cough, 95
Serological methods for detection of *B. abortus* antibodies in sera from vaccinated and non-vaccinated cattle, 491
Snails, with schistosomiasis, estimating duration of latency and survival time, 77
Solid-phase enzyme-linked immunosorbent assay, for detection of African swine fever virus antigen and antibody, 363
Solid-phase radioimmunoassay, and determination of IgA antibody response in acute rubella, 69
*Spilopsyllus cuniculi* (Dale), European rabbit flea, and myxomatosis, 285; laboratory breeding, 521
Spore strips, use of for monitoring sterilization of bottle fluids, 121
Staphylococcal sepsis in a burns unit, 429
*Staphylococcus aureus* carriage and skin infection rates, hospital and office employees compared, 437
Sterilization of bottled fluids, use of spore strips for monitoring, 121
Stool viruses in babies in Glasgow. 3. Community studies, 469
*Streptococcus agalactiae*, establishing experimental mastitis in the cow, effect of an intramammary infusion of endotoxin on, 103
Swine vesicular disease virus, *in vivo* and *in vitro* studies on temperature sensitive mutants, 319

Tanapox. A serological survey of the lower Tana River valley, 273
Temperature-sensitive mutants of swine vesicular disease virus, *in vivo* and *in vitro* studies, 319
Topical medicaments for treatment of pressure sores, microbial contamination, 445

Vaccination against influenza: a five-year study in the Post Office, 157
Vaccination, with live-attenuated and inactivated influenza virus–vaccines during an outbreak of the disease, 383
Vaccination, rubella, responses to, and HLA antigens, 435
Viral hepatitis type B, salivary-mediated, risk of transmission from oral exposure to fomites, 487
Virulence and infectivity of Salmonellas, effect of antibiotic resistance plasmids, 305
Viruses: African swine fever, 353, 363; bluetongue, 539, 547; camelpox, 267; cowpox, 425; foot-and-mouth disease, 127, 507, 513; hepatitis B, 487; influenza, 11, 135, 157, 221, 383; measles, 207; Newcastle disease, 59; rubella, 69, 397, 405, 413; swine vesicular disease, 319; tanapox, 272; zikavirus, 213
Virus-vaccines, influenza, live attenuated and inactivated, in vaccination during an outbreak of the disease, 383

Well water pollution, and rainfall, in a West African (Gambian) village, 143
Whooping cough, serological diagnosis of, 95
Wound infections after surgery in a modern operating suite: clinical, bacteriological and epidemiological findings, 41

Zika virus infections in Nigeria: virological and seroepidemiological investigations in Oyo state, 213
